

Marketing Engineer

AI-native marketing · vibecoding · MCP

Why I'm the match

Honest, requirement by requirement.

Daily use of LLMs, coding & research agents, automation

I use Claude Code, MCP and multi-LLM orchestration every day to build marketing automations.

Build AI-augmented workflows that cut manual work

I design agents and pipelines that remove repetitive marketing and ops work.

Senior marketing experience

ex-Google Ads strategist, ex-Samsung Head of Digital Marketing Operations (€6M+/month media).

Build scripts / internal tools (power user, not engineer)

Vibecoding: I ship real tools and connectors as a non-developer.

Performance & measurement mindset

GA4, tracking, ROI; I judge work by outcomes, not vanity metrics.

Remote / async

Fully remote and self-directed.

WHY CONTACT ME

Chainstack asks for a marketer who lives in LLMs and coding agents and builds AI-augmented workflows. That's literally how I already work — brand-scale marketing *plus* hands-on AI building. A rare combination, and my whole portfolio proves it.
